4.1 Intermolecular and interatomic forces (ESBMM) Intermolecular forces. Intermolecular forces are forces that act between molecules. You will also recall from the previous chapter, that we can describe molecules as being either polar or non-polar.A polar molecule is one in which there is a difference in electronegativity between the atoms in the molecule, such that the shared electron pair ...

Topic: Intermolecular and Intramolecular bonds, Surface tension, Capillary action Grade (Age) Level: High School (Ages 14-18), University This course module is a summary of various intramolecular and intermolecular bonds that exist in chemistry with applications to surface tension and capillary action.

Project: Chemical Bonds, Topic: Intermolecular forces

An experiment for informal assessment is included in this chapter. This experiment is very similar to the one on intermolecular forces. In this experiment learners focus on the properties of water. This is a good experiment to do to guide learners in understanding the properties of water.

The chemistry of water | Intermolecular forces | Siyavula

The following five experiments investigate the effect of various physical properties (evaporation, surface tension, solubility, boiling point and capillarity) of substances and determine how these properties relate to intermolecular forces. Each experiment will look at a different property. Part 1: The effects of intermolecular forces ...
