in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

## **Implications Of The Global Financial**

The global financial crisis (GFC) refers to the period of extreme stress in global financial markets and banking systems between mid 2007 and early 2009. During the GFC, a downturn in the US housing market was a catalyst for a financial crisis that spread from the United States to the rest of the world through linkages in the global financial system.

The manifestation of physical risks could lead to a sharp fall in asset prices and increase in uncertainty. A disorderly transition to a low carbon economy could also have a destabilising effect on the financial system. Climate-related risks – physical and transition risks – may also affect how the global financial system responds to shocks.
