About the PowerBuilder Tutorial - - Getting Started

PowerBuilder is an event-driven, object-oriented language. The programmer creates objects and then, defines the behaviour of the system in terms of the objects and the events which can occur in the, context of an object. PowerBuilder Objects. The basic building blocks of a PowerBuilder application are objects. All programming in the PowerBuilder

Basics of PowerBuilder

PowerBuilder 11.5 adds 3D rendering to display the 3D graphs (Pie3D, Bar3D, Column3D, Line3D, and Area3D) with a more sophisticated look. The new graph styles let you use data item translucency instead of the overlays used by original 3D graph styles. However, you can still use the 3D graphs with the original rendering style if you want.
